

Game-Changing Products

IDT's Editorial Advisory Board chooses their top products of 2013

Steve Hoofard, CDT

Milling Wax Aesthetic Press

"The problem with a lot of other milling waxes is their inability/ difficulty in accomplishing post mill adjustments—most are too hard and plastic-like, requiring too much heat to melt and a lot of effort to carve and contour because of their resin component. Aesthetic Press's wax mills very nicely, but above all, handles like any other carving wax would. Additions and corrections are easily made, just as if you were waxing. The beige color is also a plus, allowing great visualization of shape and contour."

Matt Roberts, CDT

3Shape Software 3Shape

"3Shape's software is changing the way we think about dentistry. Its integration into high-quality dentistry is amazing and developing fast. I started my foray into digital dentistry dragging my feet—this got me excited."

David Avery, CDT

TruRx® DENTSPLY Prosthetics

"This technology really simplifies the crucial communication so often left unaccomplished. With TruRx®, the technician no longer must take an educated guess as to the correct anterior tooth selection for maxillary complete denture patients. All of the information is collected right on the screen."

For more information, turn to page 36 or visit dentalaegis.com/go/ldt540.
